

The decision by Sinclair broadcasting to force it's conservative view on 25% of american households by airing a psuedo documentary on all 62 of its stations is the exact reason why broadcasters should not be allowed to own a majority or more than enough stations to cover 10% of the country. Sinclair is increasingly going away from localism and enforcing their views to the public as noted in their 10 pm news formats and company editorials in such. As a general radiotelephone liscense holder I am appalled by the lack of enforcement by the fcc.
